Climate Certificate

WIND energy + CLIMATE actions

Dana-Seals A/S

has converted 100% of its electricity purchase to renewable and CO2 neutral energy produced by Danish wind power in the period

from 01 -01 -2021

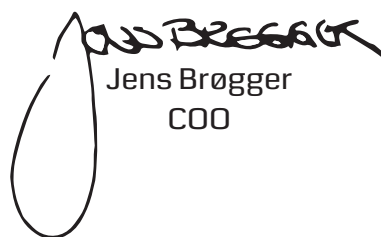

to 31 -12 -2027

At the same time, direct investment is being made to further reduce the world's CO2 emissions through one or more climate actions in 2021 - 2027

During this period, the total CO2 emissions are reduced twice: through WIND energy + one or more climate actions in different parts of the world.
